

# L.S.P.

ILLVA SUSTAINABILITY PATH

*“... proud of our past yet equally aware we must  
forever look forward.  
Indeed, our future holds great opportunities  
as well as great responsibilities.  
Our work has always stood out  
because of an unrelenting drive  
towards a continuous improvement of our know-how.”*

*Augusto Reina  
ILLVA SARONNO CEO  
1940 – 2020*

# I.S.P.

ILLVA SUSTAINABILITY PATH

In **September 2021**, Illva Saronno Holding set out on a path towards integrating sustainability into corporate strategies and, in **July 2022**, on the occasion of the **Global Marketing Event**, officially presented the **Illva Sustainability Path**, a multifaceted initiative under the guidance of the Sustainability Team and Process Factory consultants aimed at propelling **ILLVA Group** towards a bright future of **sustainable growth**.

ILLVA SUSTAINABILITY PATH

# I.S.P. – ILLVA SUSTAINABILITY PATH

The ILLVA Sustainability Path stems from the awareness throughout the ILLVA Group that sustainability is a **central issue** for the **future of the company** and, therefore, focusing on it constitutes a clear responsibility the company has towards its **stakeholders**.

The I.S.P. project follows the 17 Sustainable Development Goals – SDGs of the 2030 U.N. Agenda, starting with an analysis of the company's major impacts regarding

- ESG factors:
-  ENVIRONMENTAL
  -  SOCIAL
  -  GOVERNANCE

# THE PATH

ILLVA's sustainability path has been planned following international ISO regulations and GRI - Global Reporting Initiative, which require not only a serious and quantitative analysis of the company's current situation, essential for setting concrete goals, but also the involvement of key stakeholders in order to receive valid indications on the priorities for the future development of the plan.

The I.S.P. project will enable ILLVA to complement the initiatives already implemented with an organic plan of interventions to be developed over time to make the Group increasingly sustainable, leading it to report, through the publication in 2023 of the **Sustainability Report**, on its impacts, goals and commitments for the future.

# REQUESTS FROM AROUND THE WORLD

**NORWEGIAN MONOPOLY:**  
Request for Sustainability  
Certification regarding  
Jamaican Rhum.

**UK TESCO CLIMATE  
CHANGE SURVEY:**  
Request to communicate  
the company's  
commitment on specific  
sustainability issues.

**JAPANESE MARKET:**  
Keen interest of  
consumers and  
distributors

**UK WAITROSE CLIMATE  
ACTION:**  
Suppliers must achieve  
Net Zero EmissionS by  
2050

**I.S.P.**  
ILLVA SUSTAINABILITY PATH

# ACTIONS IMPLEMENTED

IRISH WHISKEY

ILLVA group has shown on several occasions its attention to sustainability issues :

Elimination of plastics from promotional packaging

Saving over 7 tons of plastics per year

New water cycle for washing bottles

Minimal waste of water

Halogen lights replaced by LEDs

Saving around 60% on energy consumption

## ACTIONS IMPLEMENTED

Conversion from diesel to methane as fuel  
for the heating system

An estimated saving in CO<sub>2</sub> emissions, for  
2022, of around 279.000 Kg

Installation of a photovoltaic system  
covering the entire roof of the plant

An estimated saving in CO<sub>2</sub> emissions of  
around 700.000 kg so far

The reliance on solar panels, with the combined  
use of green energy, allows the  
**SARONNO HUB TO BE POWERED BY RENEWABLE  
SOURCES ONLY**

# ROADMAP 2022...

**JUNE**

Approval of the  
Organizational and  
Management Model and  
of the Code of Ethics

**JULY**

Audit on waste  
management

**SEPTEMBER**

Definition of the study  
perimeter about the  
Carbon Footprint, Water  
Footprint and Life Cycle  
Assessment analysis

**NOVEMBER**

Questionnaire preparation:

- Business climate analysis
- Supply Chain mapping
- Stakeholder Engagement

...TO 2023

Sending questionnaires,  
collecting data and  
defining improvement  
plans
